Subject: Receipt of 8 replacement diskettes containing IHRLI database information.

Mark,

Thanks once again for sending the diskettes. I scanned the eight diskettes you enclosed and they check out as completely free of viruses. As we discussed over the phone, since it was just one of the previous nine diskettes which was infected with the "form" virus it is very likely that the infection was limited to that particular diskette, and not spread from your lan-based database system. However, considering the importance of the data, it certainly would be worthwhile to get a check done just in case.

Best regards.
