THE ADMINISTRATION OF UNITED STATES FOREIGN POLICY THROUGH THE UNITED NATIONS. By Donald G. Bishop. Dobbs Ferry, New York: Oceana Publications, Inc. 1967. Pp. x, 112. \$3.00. Realizing that the United Nations is the meeting place of 122 nations and that most of these governments have had little experience with international organizations, Dr. Donald G. Bishop studies the administration of United States foreign policy through the United Nations. Beginning with a discussion of the support which the American people have given the United Nations, the author in turn describes the many agencies which play a part in determining foreign policy and the difficulties in coordinating these groups. The book concludes with an examination of the role played by the American Congress in the United Nations, and some conclusions are drawn about future United States-United Nations relationships.

TREATISE ON JUSTICE. By Edgar Bodenheimer. New York: Philosophical Library, Inc. 1967. Pp. 314. \$10.00. Premised upon the view that justice is an ethical value identifiable with certain existential needs of human beings and rejecting the idea that justice is an irrational ideal unamenable to ascertainment, the author examines the goals of justice, political and social justice, economic justice, penal justice, and international justice. His conclusion is that a completely just order would be one in which society draws its inspiration from an image of justice which reflects the highest potentialities capable of being achieved at the time. That is an order in which each individual is free to contribute to the best of his ability and receives rewards proportionate to his achievements.

THE PREPARATION OF COMMERCIAL AGREEMENTS. By Ludwig Mandel. New York: Practising Law Institute. 1966. Pp. x, 191. \$5.00. Providing copious references to the changes wrought in commercial law by the Uniform Commercial Code, the author discusses the requisites of well-drafted commercial agreements, sales and purchase agreements, and employment contracts. In addition to enlightening textual treatment of these areas, Mandel has provided a number of illustrative forms which will prove helpful to the lawyer with limited experience in drafting commercial agreements. Both timely and practical, the volume may serve to bridge the gap between textbooks on commercial transactions and existing formbooks.
